

I pay for a service in XM radio and I feel I should be able to listen to traffic and weather on this service. I do not understand why this is an issue and would be taken away when I pay for TV cable to give me weather and traffic, but I wont be able to listen to it on my paid service in my car. Please explain to me why this is going to be taken away or is even an issue. I urge you to reject NAB's petition 04-160, unless they are willing to pay me to listen to there service.
